## PROFESSIONAL SUMMARY

Java Full Stack Developer (PG-DAC, CDAC Kharghar) with hands-on experience building full-stack web applications using **Java**, **Spring Boot**, **React.js**, and **MySQL**. Strong foundation in **REST API development**, **Microservices Architecture**, **Hibernate**, **object-oriented design**, and **SOLID principles**. Delivered projects with role-based access control, payment integration, and database optimization, working in an **Agile** workflow with Git and Postman. Seeking a Software Developer role in a growth-oriented engineering team.

## TECHNICAL SKILLS

- **Programming Languages:** Java (Core & Advanced), C#, Python, C, C++, JavaScript
- **Backend:** Spring Boot, ASP.NET (C#), Hibernate, JDBC, REST APIs, Microservices, MVC Architecture
- **Frontend:** React.js, HTML5, CSS3, JSX, Component-based UI
- **Database:** MySQL, PL/SQL – schema design, CRUD operations, query optimization, relational modeling
- **Security & DevOps:** JWT, Docker, Kubernetes, Kafka, Git, GitHub
- **Tools:** Postman, Swagger, VS Code, STS4, Browser DevTools, GitHub Copilot, Cursor AI, ChatGPT, Claude AI, Gemini AI
- **Concepts:** OOP, SOLID Principles, MVC, REST, Agile, Debugging (IDE & Browser Console), Code Review

## PROJECTS

- **KrishiSetu** | **Spring Boot, C# (.NET), React.js, MySQL** *GitHub*
  - Built a full-stack web platform connecting **4 user roles** (Admin, Farmer, Machinery Owner, Farm Worker) for farm machinery rental and labour hiring – designed and implemented complete role-based access control with admin verification.
  - Developed **10+ REST API endpoints** using Spring Boot and C# ASP.NET handling bookings, availability management, earnings tracking, and user authentication.
  - Designed a normalized **MySQL relational schema** with referential integrity across user, machinery, booking, and payment tables – optimized queries for improved response time.
  - Built **React.js** frontend with component-based architecture, form state management, REST API integration, and multi-language support serving diverse user groups.
  - Integrated a **payment system** and availability scheduling module, improving coordination and platform usability for farming communities.
- **Travel Planner** | **Node.js, React.js, MySQL**
  - Built a full-stack Travel Planner with **Node.js** REST backend and **React.js** frontend for complete trip and itinerary lifecycle management.
  - Implemented **CRUD operations**, role-based authentication (Admin/User), and an Admin dashboard for user and trip management.
  - Designed a relational **MySQL** schema; wrote and optimized SQL queries to improve data retrieval performance.
  - Followed the full development lifecycle: requirements analysis → backend API design → frontend integration → testing → debugging using browser DevTools and server logs.

## WORK EXPERIENCE

- **Trainee** | Mumbai Metro Rail Corporation (MMRC) *May 2023 – June 2023*
  - Studied 25kV power system traction flow (TATA Power → substation GIS → Metro Line-III) – developed understanding of large-scale infrastructure electrical systems.
  - Surveyed active construction sites on the Colaba-Bandra-SEEPZ corridor; documented technical observations and collaborated with cross-functional engineering teams.

## ACHIEVEMENTS & LEADERSHIP

- **Core Member – Aero FCRIT Club** *July 2022 – June 2023*
  - **AIR-1** – SAEINDIA Automated Drone Development Challenge, Chennai: led electrical propulsion system design and delivery in a cross-functional team under national competition pressure.
  - **AIR-6** – Drone Development Challenge, Chennai; **3rd Rank** in inter-college Technical Presentation.
  - Performed hands-on technical flight testing and hardware validation for drone propulsion systems.
- **Program Coordinator – EESA Council** *July 2022 – May 2023*
  - Organized and executed college-level technical seminars; led documentation team for program reports and stakeholder communication.
